EMPLOYMENT HISTORY

July 1990 -Present (full time and part time) - **M.D.S. COMPUTER SERVICES**
(Contracted Services and Consulting)

Contracted Software/Computer Services

Performing computer consulting/contracted/services with various businesses nationwide (Private Industry, Educational, Medical and Government sectors). Services include software development, programming, data analysis, data migration, systems analysis, hardware/system configurations, applications/server security, training, reporting and conversions. Custom programs, bridging existing applications, upgrades, and improvements to business applications. Software and hardware installations. Analyzing business needs and operations. Troubleshooting applications, DBA functions, databases and permissions. Contracts include government, school districts, statewide companies, and businesses throughout South Carolina and other states. Specialties include database programming (Access, SQL, VB, scripting and various other languages). Clients have included US Dept. of State, Spawar (medical systems), Charleston County School District, New Hope Treatment Centers, PsychSolutions/ABS, General Electric, Bosch, Albright & Wilson Chemicals, SC State School Districts, Hudson Mann, Roper Hospital, Spawars, and more. Accomplishments have included but not limited to:

- ❖ Database Development, Reports, GUI enhancements
- ❖ Completion of platform to link 3 Delphi programs using Access, VB and SQL
- ❖ Complete Plans & Specs program for multiple operations plants – Access & VB
- ❖ HR, payroll and job costing programs – Access, VB and SQL, Oracle
- ❖ Electronic Claims EDI programs (X12 files) such as 837I, 837P, 270, 271, 275, 276 and more (claims, requests for 835's /remittance advice, patient eligibility, etc.). Program has been sold to various companies and modifiable for connections to existing billing system. Also perform Billing Service and can remit electronic claims for clients, obtain any EDI files on behalf of the client, and product reports for client accounting.
- ❖ Analysis, recommendations, project management for programs developed in Cobol, Focus, Paradox, Clipper, VB, Access, SQL, Oracle, Delphi, SASI, ZIS/SIF, Cold Fusion, .NET, and many others.
- ❖ Business software development eliminating redundant data entry
- ❖ Web design (Microsoft Web Expressions, .NET, .ASP, ColdFusion, etc)
- ❖ Medical software (VB, VBA, Access, SQL, Oracle, and more) including Patients, Q&A, Performance Improvement, Utilization Review, Billing, Attendance, Census, Referrals and more.
- ❖ SQL Stored Procedures, triggers and queries, DTS, enhancements. SSIS and SSRS for data warehousing projects and analysis.
- ❖ Reporting (any type of reporting software, Crystal, Access, SQL Reporting SSRS, etc)
- ❖ Year-end analysis of international financial systems accurately in languages I was unfamiliar with
- ❖ CRM programs for sales teams and managers
- ❖ Complex data migrations between applications and servers
- ❖ Creation of Technical and User Manuals for IT and other business functions
- ❖ Data conversions and transfers between different backend databases and front end applications
- ❖ Fixed camera and security software to work across the web and added security measures for video streaming so client's ISP would not stop services due to spamming issues.
- ❖ Many more types of apps (engineering, medical, general business, educational, call centers, financial, etc)

2012 – 2014 – **Spawar**

(Database Administrator/System Administrator/VM engineer)

System Administrator and DBA developing cloud environments with SQL Server Clustering and OS Clustering. Security Clearance. Stigs implementation, VMware Engineer. Trouble-shooting cluster configurations, ports, and successfully fixing to be compliant. Comp-TIA+ Security Certified. Developed scripts that automated stigs and reporting of security. VM migrations and load balancing, PVS/STA integrations (Citrix).

PERSONAL ASSETS

- * People and computer skills
- * Efficiency/Organized
- * Strong analysis skills
- * Easy to work with
- * Surpassing client expectations
- * Trustworthiness
- * Reliability/Dependability
- * Work well with no supervision
- * Project leadership
- * Sense of humor
- * Accurate projections for timelines
- * Confidentiality

CLIENT GOALS

To work with clients where progressive database and software development are key elements. To assist clients with software/hardware projects. Analyze client needs and provide solutions by analysis and/or design. To help clients obtain their goals with the use of software/hardware for accuracy and integration. To give clients applications they enjoy using and can obtain accurate information from.

SUMMARY OF EXPERIENCE

Computers – SQL DBA, developed SQL and OS Clusters, software development/proramming, research and development, data management, training, software and hardware installation, data processing, systems analyzation, desktop publishing, graphic arts, troubleshooting, repairs, design of technical and user manuals. Built platforms for 3rd party software. Designed user-friendly applications, both personal and client-server types. Analyzed many programming languages (code) and recommended changes or conversions. Designed database front-ends (VB, Access, Paradox, Cobol and various others) and used server-type tables (Oracle, SQL, etc). Analyzed data problems and corrected. Worked with 3rd party programming staff to customize program as needed by clients. One if the first developers/vendors to remit electronic claims into BC/BS and Medicaid systems which entailed working together to ensure both ends of the applications were working effectively and incorporating changes as needed to meet Hipaa specs and regulations. The only programmer to do year-end analysis for Dept. of State involving multiple languages for multiple financial systems. SQL DBA for Chas County School District for 2 ½ years. Custom Design and selling of software to SC School Districts and medical facilities.

Medical and Claims – Designed and developed medical billing and X12 software for medical facilities and school districts.

Finance/Acct - A/R, A/P, Payroll, forecasting, cost analysis, statistics, invoicing.

Management - Board of Directors presentations, supervisory, heading staff meetings, conducting employee meetings, department head, department budgeting and cost control.
